

Test No. 10-594: Tenprint Examination Research Test

DATA MUST BE RECEIVED BY November 08, 2010 TO BE INCLUDED IN THE REPORT

Participant Code:

Report Code:

This test is divided into three separate sections: Quality Control Review, Comparison of Tenprint Submissions to Standards on file and Comparison of Individual Prints to Standards on file.

Items Submitted (Sample Pack R2):

- Items 1-7** Seven tenprint and palm cards for quality control review.

- Standards 1-4** Four Standard tenprint cards to be used for comparison against the submission tenprint cards and the single print impressions.
- Submissions 1-6** Six tenprint cards for comparison against the Standard tenprint cards.
- Prints A-O** Fifteen single print impressions for comparison against the Standard tenprint cards.

Section 1 - Tenprint Quality Control Check

For Items 1 through 7 please review each print for sequence accuracy and indicate if the print has been appropriately recorded in the Tenprint grid (including palms). Then indicate pattern type for each print (not including palms). Please indicate the pattern type using one of the four base patterns followed by the specific Arch or Whorl type if required by your laboratory reporting policies.

Indicate the results of your comparisons by marking the appropriate boxes.

Please place a result for each item in this section. If you have indicated that a print has not been appropriately recorded, please do not indicate the pattern type for that print.

Example Pattern Type: (See attached glossary)

Is Print Appropriately Recorded? Please indicate the pattern type using one of the four base patterns followed by the specific Arch or Whorl type if required by your laboratory reporting policies.

If you have indicated that a print was not recorded appropriately, please briefly explain why.

Section 2 - Tenprint Submissions for Comparison to Standards

For Submissions 1 through 6 please compare each tenprint against the provided Standards. Indicate if the submission is or is not identified to one of the provided Standard Tenprint cards.

Indicate the results of your comparisons by marking the appropriate boxes.

Please place a result for each tenprint in this section.

If a conclusive identification cannot be made, check "Not Identified". Please do not leave a blank response as a result.

Section 3 - Individual Print Comparison to Standards

For Prints A through O please compare each print against the provided Standards. Indicate if the print is or is not identified to a finger in the provided Standard tenprint cards.

Indicate the results of your comparisons by marking the appropriate boxes.

Please place a result for each print in this section.

If a conclusive identification cannot be made, check "Not Identified". Please do not leave a blank response as a result.

3.) Does the quality of the samples meet your lab's standards for testing? _____

If not, in what way are they lacking?

4.) Is the amount of material sufficient to test your proficiency? _____

If not, what would be a sufficient amount of material

5.) Is the packaging adequate (including protection of the samples)? _____

If not, what changes are needed?

6.) Would you like to see this test offered as digital images on DVD? _____

If yes, what uncompressed image format would you prefer? .tiff or .bmp _____

Appendix: Fingerprint Pattern Types - Names & Definitions

Taken from the published Glossary by the Scientific Working Group on Friction Ridge Analysis, Study and Technology (SWGFAST). Dated May 8, 2009 Glossary Version 2.

ARCH - PLAIN

A fingerprint pattern in which the friction ridges enter on one side of the impression and flow, or tend to flow, out the other side with a rise or wave in the center.

ARCH - TENTED

A type of fingerprint pattern that possesses either an angle, an upthrust, or two of the three basic characteristics of the loop.

LOOP - RADIAL

A type of pattern in which one or more friction ridges enter upon either side, recurve, touch or pass an imaginary line between delta and core and flow out, or tend to flow out, on the same side the friction ridges entered. The flow pattern runs in the direction of the radius bone of the forearm (toward the thumb).

LOOP - ULNAR

A type of pattern in which one or more friction ridges enter upon either side, recurve, touch or pass an imaginary line between delta and core and flow out, or tend to flow out, on the same side the friction ridges entered. The flow pattern runs in the direction of the ulna bone of the forearm (toward the little finger).

WHORL - PLAIN

A type of fingerprint pattern that consists of one or more friction ridges which make, or tends to make, a complete circuit, with two deltas, between which, when an imaginary line is drawn, at least one recurving friction ridge within the inner pattern area is cut or touched.

WHORL - DOUBLE LOOP

A type of fingerprint pattern that consists of two separate loop formations with two separate and distinct sets of shoulders and two deltas.

WHORL - CENTRAL POCKET LOOP

A type of fingerprint pattern that has two deltas and at least one friction ridge which makes, or tends to make, one complete circuit, which may be spiral, oval, circular, or any variant of a circle. An imaginary line drawn between the two deltas must not touch or cross any recurving friction ridges within the inner pattern area.

WHORL - ACCIDENTAL

1. With the exception of the plain arch, a fingerprint pattern consisting of two different types of patterns with two or more deltas.
2. A pattern that possesses some of the requirements for two or more different types.
3. A pattern that conforms to none of the definitions.
