

# INDIVIDUAL REPORT

Participant Code: **U1234A**

## Test 08-533:

WebCode: **ABCDEF**

### Imprint/Impression Evidence

**Test Summary:** Test material consisted of two photographs containing seven questioned footwear imprints (Q1-Q7), two photographs of the suspect shoe sole (K1a - K1b), and two photographs of inked exemplar imprints made with the shoe (K1c-K1d). Participants were requested to determine if any of the questioned imprints were made by the suspect sole. Three of these imprints (Q2, Q3 and Q6) were made by the suspect left shoe; the remaining imprints were made by three other shoes. *(Please see the Summary Report for additional summary comments and information.)*

#### Examination Results

Indicate the results of your comparisons of the suspect left shoe with the questioned imprints by placing a mark in the appropriate box.

Imprint		Q1	Q2	Q3

	Inc	3 (1%)	2 (0.8%)	1 (0%)	2 (1%)

#### Conclusions

As a result of my examination I formed the following opinions: the partial shoe outsole impressions marked Q2 and Q3 on the hallway floor were made by the shoe K1 (left suspect's shoe) and no other. The partial shoe outsole impression marked Q6 on the teacher's lounge floor was made by the shoe K1 (left suspect's shoe) and no other. The partial impressions marked Q1, Q4, Q5 and Q7 were not made by shoe K1 (the suspect's left shoe).
